

February 9, 2024

We received your Request for Reconsideration regarding the DVD *High Life*. This movie has been in the collection since July 2019, and it has been checked out 16 times. We reviewed it and have decided to retain it in the Adult Fiction DVD section.

The DVD cover art has an MPAA rating "R" printed on the back, along with the reasons for the rating. Additionally, Christian County Library staff apply red "R" stickers to the spine of any DVD that is rated R. The bibliographic record also includes the rating and the reasons, "disturbing sexual and violent content including sexual assault, graphic nudity, and for language."

This is a fairly popular movie, having around 40,000 viewer ratings on IMDb.

While this film may not be appropriate for all audiences, it is up to individual patrons to determine what is or is not suitable for their household. The library has a variety of tools a parent can use to assist their children and teens with materials selection, including physical location, online catalog information, and staff assistance.

We encourage parents to visit the library with their children and/or review selected materials before or after checkout. A parent or guardian is the responsible party for their child's library account and can view checked-out items at any time through the library, over the phone, or online at coolcat.org.

Please feel free to contact me if you have any further questions or concerns.

Sincerely,
Renee Brumett, Executive Director
Christian County Library
